

Activity Report for Scientific Psychometric Career Counseling Assessment and Counseling Session for Students of Gokhale Memorial Girls' College, Kolkata

Purpose:

Career counseling assessment is scientific evidence based method of assessing the innate potentials of an individual and to further match their abilities and aptitudes with their interest pattern. The purpose is to help them make a wise selection regarding their career so that they are able to choose a job and career that best suits them. An assessment of this kind during the course of the undergraduate education is expected to provide the students with a strong ground to make wise choices in their career after passing the college. With this aim in mind, Gokhale Memorial Girls' college in collaboration with Nabajatak Child Development center, Kolkata formulated a psychometric career counseling assessment plan for the students of the college. The first phase of the career counseling assessment and the follow up counseling sessions of the students have been completed by the competent experts.
