2019-2020

The Department of Communicative English participated in the Annual Exhibition hosted by the college. The theme which the students of the department centred their presentations and activities around was ***Popular Media: Radio, Television and the Digital Universe***. The students at the Radio booth modelled as a Radio Station interacted actively with the visitors and guests, conducted live quiz sessions, performed radio-format scripts and played music with corresponding background information provided on the same. The television booth modelled as a television channel hosted live chat shows and panel discussions by our students. The Games and Open Mic Booth was alive with participation throughout the day.
